

ENTERPRISE PROJECT

Modern systems.

More efficient processes.

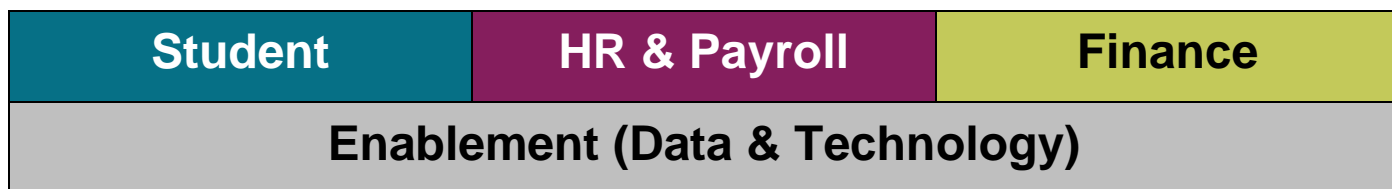

A better work day.

What is the Enterprise Project?

The Enterprise Project is a **business process transformation** and **systems implementation** that will leverage Workday and other enterprise technologies to:

- Advance the university's mission
- Enable the strategic plan
- Deliver consistent processes and experiences
- Drive effective decision making

The Enterprise Project will improve foundational university operations in 4 areas.

What is our Strategic Direction?

- **Student:** Improve the undergraduate, graduate and professional student experience through consistent and streamlined processes so that time and cost to degree completion is decreased, while student engagement is increased.
- **HR & Payroll:** Improve foundational classification and compensation data and create standard HR and payroll practices so that non value-added work is reduced and the staff/faculty experience is enhanced.
- **Finance:** Improve financial data and reporting through streamlined, consistent processes so that efficiencies are maximized, administrative burden is reduced and decision making is enhanced.
- **Enablement:** Deploy technology, process and governance solutions to enable agile hospital, college and VP unit-driven results.

Notable Improvements

<p style="text-align: center;">Student</p> <ul style="list-style-type: none"> • Consistent and high-quality undergraduate advising services • Coordinated engagement with students and alumni across the university • Cross-college visibility into scholarship funds • Modern course catalog and scheduling functionality • Access to services when and how students want (i.e. mobile) 	<p style="text-align: center;">HR & Payroll</p> <ul style="list-style-type: none"> • Standardized payroll and time tracking • Streamlined employee recruitment and hiring experiences • Long-term model for who does what, where across all HR services • Greater transparency for employees and managers into HR transactions
<p style="text-align: center;">Finance</p> <ul style="list-style-type: none"> • Enhanced grants management experience for researchers • Shift to managing budget variances and enable long-term planning • Common accounts receivables processes • Consistent supply chain processes 	<p style="text-align: center;">Enablement</p> <ul style="list-style-type: none"> • Standardized, simplified data models • Consistent integrations methodology and approach • Institution-wide data analysis and reporting platform • New enterprise system governance and support structures
